

HHSAC

HHSAC Verification Guide (Tier-1)

Tier-1 - Public Tier-1 Document

Document ID	HHSAC-VER-001
Title	HHSAC Verification Guide (Tier-1)
Version	v1.0.2
Publication Date	2026-02-12
Classification	Tier-1
Status	Active
Owner	Program Office
Official Contact	evidence@hhsac.org

Verification-Only Public Surface: This document is intentionally sanitized. It provides governance and verification information sufficient for initial compliance review without exposing sensitive operational details.

Evidence-First Definition: Any reference to 'delivered' means only POD-indexed delivery recorded in the evidence register at a controlled point. HHSAC does not claim patient-level delivery or end-user receipt.

Compliance-by-Design: HHSAC does not facilitate evasion of laws, sanctions, or controls. Ambiguity triggers EX/HOLD until resolved through documented escalation.

Purpose

This guide explains how to verify Tier-1 documents and how to request Tier-2 verification materials in a controlled manner.

Step 1 - Verify Document Authenticity (Tier-1)

- Locate the document's Doc ID and version on the cover page (e.g., HHSAC-CTL-001 v1.0.2).
 - Go to the HHSAC Document Registry and find the matching Doc ID entry.
 - Compare the SHA-256 checksum of your file to the registry checksum. A mismatch indicates the file is not authentic or has been altered.
 - Confirm the registry status is **Active**. Superseded or Withdrawn documents must not be relied upon.
- Registry support: registry@hhsac.org.

Step 2 - Interpret Status and Classification

- **Tier-1**: public sanitized governance/verification documents.
- **Tier-2**: controlled disclosure materials (operational and detailed artifacts) referenced by Doc ID but not publicly posted.
- **Active**: current valid version. **Superseded**: replaced. **Withdrawn**: invalid; escalate.

Step 3 - Request Tier-2 Access (Controlled, under NDA)

- Send a request to Program Office including: requesting entity, role (Prime/Bank/Regulator), purpose, scope, and identifiers (Doc IDs or evidence index references).
- Execute the mutual NDA (HHSAC-NDA-001) or an approved equivalent.
- Await approval after boundary checks (minimization/redaction and compliance screening).

Tier-2 access pathway: programoffice@hhsac.org.

Step 4 - Report Anomalies or Concerns

- Checksum mismatch, altered metadata, suspicious versions, or inconsistent claims must be treated as integrity incidents.
- Do not forward suspect files; preserve the file and send a note to Evidence & Verification and Compliance & Risk.
- If uncertainty exists, default to HOLD and request clarification before reliance.

Evidence: evidence@hhsac.org - Compliance: compliance@hhsac.org.

Assurance Limits (Important)

- HHSAC verification is evidence-bounded: it verifies governed handover at controlled points and associated documentation, not downstream distribution or outcomes.
- Tier-1 documents are verification framing; they are not operational promises, political statements, or medical assurances.
